Portfolio | LinkedIn
baker.jst@gmail.com | 919.656.1229 | Durham, NC

RESEARCH & TECHNICAL INTERESTS

Geographic Information Science
Spatial Data Analysis
Remote Sensing
Environmental Analysis
Machine Learning
Geopolitics

EDUCATION

NC STATE UNIVERSITY
GIS GRADUATE CERTIFICATE
Raleigh, NC

**ROYAL INSTITUTE
OF TECHNOLOGY**
GRADUATE COURSEWORK
Sustainable Urban Planning
and Design
Stockholm, Sweden

**APPALACHIAN STATE
UNIVERSITY**
B.S. SUSTAINABLE TECHNOLOGY
Minor in Sustainable Development
Boone, NC

TECHNICAL SKILLS

GEOSPATIAL & ANALYTICAL TOOLS

ArcGIS Pro
ArcGIS Online
Experience Builder
StoryMaps
Dashboards
Field Maps

PROGRAMMING

Python
SQL
Git/GitHub

PROFESSIONAL EXPERIENCE

JMT | GIS ANALYST

March 2026 - Present | Raleigh, NC

- Develop GIS-based solutions by translating project requirements into geospatial workflows and analytical outputs.
- Research, develop, and offer innovative approaches to problem solving.
- Assist with application deployment and testing at client site.

SKEO SOLUTIONS | ASSOCIATE

February 2024 - November 2025 | Remote

- Led development of a public-facing geospatial dataset and web application, including workflow design, team coordination, and data maintenance.
- Created high-quality static maps for Five-Year Reviews of EPA Superfund sites.
- Developed GIS automation solutions for various data processing workflows.
- Integrated and configured web-based GIS applications, including symbology, filtering, and data visualization for non-technical users.
- Performed detailed QA/QC of web application components, reviewing HTML code for compliance with Section 508 of the Rehabilitation Act.
- Assisted with long-term research efforts to collect nationwide economic and property value data.

CENTERLINE COMMUNICATIONS | GIS ENGINEERING TECHNICIAN

May 2022 - July 2023 | Remote

- Produced high-quality maps and design staking packages of fiber optic networks for engineering and construction teams.
- Created and georeferenced vector features, edited relationships, and identified and corrected errors introduced when merging data sets from multiple sources.
- Translated spatial data into spreadsheets to calculate budgets and materials.
- Processed and supported field data collected with Collector and Field Maps.
- Created custom geoprocessing tools with Python to optimize workflows and QA/QC processes.

LEIDOS | GIS TECHNICIAN

Aug 2021 - May 2022 | Durham, NC

- Supported major electric distribution projects and data maintenance for complex and high priority projects.
- Referenced as-builts, work management logs, and other documentation to update GIS data to reflect completed electric distribution construction.
- Identified data inconsistencies and communicate with the appropriate resources to provide accurate data updates to client systems.

PROJECTS

**MÄRSTA SUSTAINABLE PLANNING ASSESSMENT | KTH SCHOOL
OF ARCHITECTURE AND THE BUILT ENVIRONMENT**

October 2016 | Stockholm, Sweden
